Diseño moderno con alma de tradición japonesa.

Modern design with Japanese tradition.

Inspirado en los cuchillos japoneses Kiritsuke, Kaji es una pieza de diseño único. Su hoja con acabado damasco revela el saber hacer artesanal con líneas ligeramente curvadas para un corte preciso. El mango, de madera maciza con un toque de color, reinterpreta los mangos octagonales tradicionales para la mesa moderna, ofreciendo ergonomía y equilibrio perfectos.

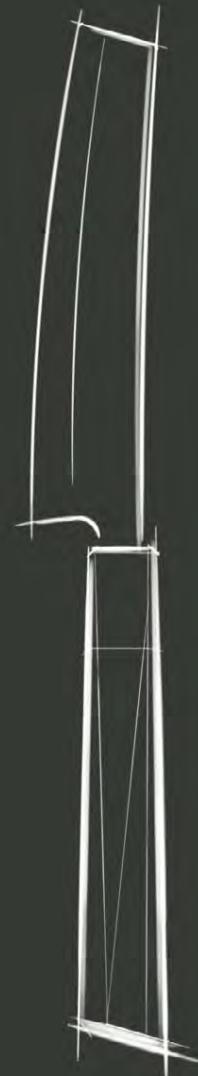

Le acompaña un tenedor con dos puntas y mango simétrico, completando un conjunto icónico y exclusivo. El Nombre Kaji significa "forja" o "fuego" en japonés, refleja el proceso meticuloso de creación de esta pieza única.

Inspired by the Japanese Kiritsuke knives, Kaji is a unique piece of design. Its damask-finished blade reveals the craftsman's know-how with slightly curved lines for a precise cut. The handle, solid wood with a touch of colour, reinterprets traditional octagonal handles for the modern table, offering perfect ergonomics and balance.

It is accompanied by a fork with two prongs and a symmetrical handle, completing an iconic and exclusive set. The name Kaji means 'forge' or 'fire' in Japanese, reflecting the meticulous process of creating this unique piece.

Uno de los proyectos troncales que se desarrollaron en la 18a edición del Master en Diseño y Desarrollo de Producto, fue el proyecto que Comas propuso a los alumnos del Master. El reto consistió en diseñar y desarrollar un cuchillo icónico que pudiera complementar algunas de las colecciones actuales de nuestro catálogo.

Los 26 alumnos del Master, repartidos en 5 grupos, en la 1a fase conceptual presentaron 26 propuestas de diseño de nuevos cuchillos, de los cuales desarrollaron 12 propuestas con todo detalle y llegaron a un prototipo volumétrico de calidad, siguiendo las indicaciones de la empresa.

One of the core projects developed in the 18th edition of the Master's Degree in Product Design and Development was the project that Comas proposed to the Master's students. The challenge consisted of designing and developing an iconic knife that could complement some of the current collections in our catalogue.

The 26 Master's students, divided into 5 groups, presented 26 design proposals for new knives in the 1st conceptual phase, of which they developed 12 proposals in detail and reached a quality volumetric prototype, following the indications of the company.

Acero inoxidable 7Cr17Mov

7Cr17Mov Stainless steel

El acero de los cuchillos de mesa Utset ha sido tratado térmicamente para alcanzar una alta dureza y resistencia al desgaste y durabilidad, lo que significa que mantendrá su filo y estructura en condiciones de uso exigente.

El acero 7Cr7Mov es un tipo de acero que se ha hecho popular en la fabricación de cuchillos gracias a su resistencia a la corrosión.

The steel in Utset table knives has been heat-treated to achieve high hardness and wear resistance and durability, which means it will maintain its sharpness and structure under demanding conditions of use.

7Cr7Mov steel is a type of steel that has become popular in knife making due to its resistance to corrosion.

Madera estabilizada

Stabilised wood

Material fabricado mediante la inyección de resinas termosetables y color en la madera. Con esta inyección de resina se obtiene un sellado de mayor dureza, impermeabilidad y resistencia.

Además, con el color podemos personalizar la madera y crear diferentes patrones y variedad de gamas dándole un toque de sofisticación y originalidad al cuchillo.

Material manufactured by injecting thermosetting resins and color into the wood. With this injection, a seal of greater hardness, impermeability and resistance is obtained.

In addition, with colour we can personalise the wood and create different patterns and a variety of ranges, giving a touch of sophistication and originality to the knife.

Acero de carbono

El 52100 es un acero al cromo con alto contenido en carbono que ha ganado popularidad en el mundo de la cuchillería para hojas de alto rendimiento.

Conocido por su excepcional dureza, resistencia al desgaste y retención del filo, se utiliza a menudo en cuchillos personalizados de gama alta que requieren una durabilidad superior.

Al ser un cuchillo no inoxidable, se le ha aplicado una patina negra en toda la hoja para evitar que se oxide fácilmente. Aún así aconsejamos lavarlo siempre a mano y secarlo rápido.

Si se guarda durante tiempo es aconsejable untar de aceite mineral la hoja y la espiga así como guardarlo protegido con funda o saya.

Raíz de abedul estabilizada

El mango, de raíz de abedul estabilizada proporciona a la colección la elegancia de una madera noble.

El proceso de estabilización protege y sella la porosidad de la madera para garantizar una mayor durabilidad y resistencia, además de resultar muy agradable al tacto.

Aún siendo un material duradero y resistente es importante evitar el lavavajillas y mantener siempre el cuchillo seco.

Carbon steel

52100 is a high-carbon chrome steel that has gained popularity in the world of high-performance knife making.

Known for its exceptional hardness, wear resistance and edge retention, it is often used in high-end custom knives that require superior durability.

As a non-stainless knife, a black patina has been applied to the entire blade to prevent it from rusting easily. Even so, we advise to always wash it by hand and dry it quickly.

If it is stored for a long time, it is advisable to smear mineral oil on the blade and tang and to keep it protected with a saya.

Stabilised birch root

The handle, made of stabilised birch root, gives the collection the elegance of a noble wood.

The stabilisation process protects and seals the porosity of the wood to ensure greater durability and strength, as well as being very pleasant to the touch.

Yet being a durable and resistant material, it is important to avoid dishwashing and to always keep the knife dry.

Estas pinzas monobloc fabricadas en acero inoxidable son funcionales tanto en buffet como en cocina. Su mango de PVC en distintos colores permite controlar la contaminación cruzada de los alimentos.

These monobloc tongs in stainless steel are just as functional for service at a buffet as in the kitchen. Their distinctively coloured PVC handles makes it easy to control cross-contamination between different foods.

El término "finger food" se refiere a alimentos que se pueden consumir con las manos, sin la necesidad de cubiertos. Estos platos suelen ser pequeños, fáciles de comer y están diseñados para ser saboreados en una o dos mordidas.

Siguiendo este concepto, Comas ha creado una colección de cubiertos de tamaño reducido, como una prolongación de nuestros dedos, que permiten disfrutar de estos platillos de manera práctica y original, ideales para caterings y eventos.

The term "finger food" refers to food that can be eaten with the hands, without the need for cutlery. These dishes are usually small, easy to eat and designed to be savoured in one or two bites.

Following this concept, Comas has created a collection of small-sized cutlery, like an extension of our fingers, which allows us to enjoy these dishes in a practical and original way.
